

Lee Ann Bear's Testimony  
In Support of Senate Bills 46 and 406  
March 13, 2009

To the Chairman, and you who are on the House seats of representatives:

I represent all of us who grew up, every school morning, pledging our allegiance to this "United States of America. A **Republic** for which it stands, One Nation Under God..." I also represent the Montana ProLife Coalition, and all the women who suffer from aborting our unborn children out of ignorance.

We all have been deceived and kept uninformed, under the 'so called' "Privacy Act," in order to lead many of us women to murder our unborn children. Some of us suffered gruesome painful treatment of both mother and the unborn child during the operation of abortion, and continue to suffer the agony and regret of these actions. We nor our murdered unborn children were being protected by our government or anyone else.

I was lead to believe it was best, right and legal to abort my first baby, only to learn in my 20's that I was lied to and coerced by Planned Parenthood, to murder my innocent healthy baby, and jeopardizing my ability to bear children. Then hearing that abortions have never truly been legalized through the proper branch of this government, I realized Planned Parenthood, Doctors, and us women, have been illegally murdering millions of innocent children by abortions since Roe vs Wade.

I know even rape and incest victims should not have the right to murder their unborn child. I was a victim of repeated incest and rape, and almost died hemorrhaging trying to carrying a child from rape. That child was a part of me, and I would have loved him or her just as my other two.

I see every conceived child is a gift, and is 'a compelling state and national interest' to protect, as is the eagle and their embryo to maturity. These aborted children might have grown up to make the laws to protect you, the eagle, and their eggs?

All law makers who enabling wrong to seem right and right seem wrong, shall be held responsible before God's judgment. It is wrong to kill the innocent defenseless unborn children. I support all attempts to protect life, as I understand our founding fathers, Dan McGee, and these bills seek to do.
